🌐 John Fredy Quimbaya Orozco

👤 Professional Summary

IT Manager, Solutions Architect, Technical Lead, and Senior Developer with over 9 years of experience designing, developing, and implementing technology solutions across the financial and healthcare sectors. Hold a solid background in Systems Engineering, complemented by a specialization in Software Engineering, an M.S. in Software Engineering, and an M.S. in IT Management. The latter has equipped me with advanced skills in negotiation, alignment with corporate IT strategic plans, and IT service governance for diverse organizations. My track record includes managing and leading highly complex projects, consolidating my expertise in management, software architecture, and digital transformation. Currently, I lead contract unification and team standardization strategies, optimizing cost-benefit ratios and maximizing organizational effectiveness.

🏢 Professional Experience

SETI (Client: Bancolombia) August 2025 – April 2026: *AI Software Architect — Generative AI & Cloud Solutions*

Lead the definition and design of the architecture for **Pro-code Agents** and **Low-code Agents** for critical use cases at Bancolombia, ensuring the scalability of Generative AI at an organizational level. My role focuses on building cross-functional capabilities through robust architectures based on the **C4 Model (Context, Containers, Deployment)**.

- **Tech Stack:** Designed high-performance microservices using **Java** with **Spring Boot** and **Python** with **FastAPI**, implementing advanced security layers via **Spring Security** (OAuth2/OIDC) to comply with banking regulations.
- **Cloud Ecosistema (AWS):** Orchestrated AI solutions on **AWS**, integrating computing, storage, and foundational models to guarantee high availability and low latency in production environments.
- **Innovation & PoCs:** Lead the technical evaluation and execution of **Proofs of Concept (PoC)** on emerging models, serving as a strategic bridge between technological innovation and the bank's operational efficiency, including software development for PoCs.
- **Technical Governance:** Oversee the modularity and maintainability of agents, ensuring seamless integration with the existing financial ecosystem and enterprise architecture standards.

Koralat

February 2024 – December 2025: *Solutions Architect*

Led the evolution of the Core system towards a **Microservices** architecture, collaborating with Cobis Topaz to ensure a seamless migration. Managed technical and budgetary agreements, achieving an optimal cost-benefit balance in **AWS** services. Conduct technical feasibility assessments for high-availability and scalable solutions.

Promote the adoption of clean and decoupled architectures within the tech stack (**C# .NET Core**), overseeing all phases of the **SDLC** (Software Development Life Cycle) to guarantee high-quality deliveries. Implemented **CI/CD** strategies using Jenkins and **AWS**, significantly reducing Time-to-Market. Coordinate multidisciplinary teams under Agile methodologies, ensuring safety standards and operational efficiency.

- **End-to-end SDLC management for service modernization in C#.**
- **Migrated from IBM API Connect to Gravitee API Manager to optimize traffic management.**
- **Promoted an Agile culture, increasing productivity and the quality of delivered software.**
- **Led integration strategies with the Cobis Topaz Core Banking system.**

Universidad Cooperativa de Colombia

February 2025 - Present: *Lecturer*

Adjunct Lecturer at Universidad Cooperativa de Colombia, with a strong academic background and experience in higher education teaching core subjects such as Systems Thinking, Algorithmics, and Artificial Intelligence. Excel at structuring complex concepts into clear content, integrating theoretical and practical approaches that strengthen students' critical thinking and problem-solving skills.

In addition to technical competencies, possess outstanding skills in assertive communication, active listening, and collaborative management, enabling effective negotiation in academic environments and contribution to interdisciplinary projects. Foster a results-oriented learning culture, promoting active participation, innovation, and teamwork within the classroom.

Unicuces

February 2024 - July 2024: *Lecturer*

As a lecturer specialized in computer systems, taught courses focused on algorithms and structured programming. Course content covered topics ranging from variable assignment to method definition, as well as the use of functions in programming languages like C++ and pseudocode tools like PSeInt.

- Variable assignment and data types.
- Control structures such as if, else, else if, for, while, do while.
- Classes, functions, and methods.

Exis Digital

September 2022 - October 2023: *Senior Consultant*

In my role as Senior Consultant, actively managed system vulnerabilities in coordination with a remote team in India and the local team, demonstrating global leadership and coordination skills:

- **Upgrade Management:** Supervised and coordinated application and framework upgrades using technologies such as C#, ASP.NET, jQuery, and JavaScript, ensuring operational continuity and continuous system improvement.
- **Vulnerability Remediation:** Led the identification and remediation of vulnerabilities within our software structure, significantly increasing system stability and security.
- **Technical Collaboration:** Coordinated the resolution of complex software challenges, working closely with multidisciplinary squads of 8 to 10 people, enhancing collaboration efficiency and effectiveness.

Quantitative Achievements:

- Resolved 95% of high-impact vulnerabilities, strengthening overall system security.
- Addressed and rectified 60% of low-impact vulnerabilities, improving application stability and reliability.

Coomeva Medicina Prepagada Coordinator

November 2018 - September 2022: *Software Solutions*

- **Management & Strategy:** Assisted executive leadership in vendor selection and coordinated internal and outsourced teams for the execution of critical projects.
- **SLA Negotiation:** Negotiated Service Level Agreements (SLAs) with internal clients, aligning technical capabilities with business unit expectations.
- **Salesforce Architecture & Integration:** Led the technical integration of **Salesforce** for lead management and internal client tracking, designing interoperability via **Web Services** with the company's core system and Active Directory.
- **Technical Leadership:** Provided guidance throughout all stages of the **SDLC**, leveraging a stack based on Java, Angular, and PHP for custom solutions.

Quantitative Achievements:

- **Core Modernization:** Directed the core system migration from AS400 to SQL Server, implementing integrations in C#, Java (JBoss EAP), and PowerBuilder.
- **Payment Optimization:** Enhanced the online payment process by **90%**, drastically reducing wait times and improving user experience.

- **API Interoperability:** Implemented robust integrations using Java REST APIs, SOAP architecture, and PHP distributed applications.

Taylor and Johnson

May 2016 – April 2018: *Senior Software Developer*

Responsibilities: Design and develop robust enterprise solutions using the **C# (ASP.NET 4)** and **SQL Server** stack, specialized for the financial and healthcare sectors.

- Collaborated across the full software development lifecycle to deliver strategic solutions that met the critical needs of various financial clients.

Quantitative Achievements and Featured Projects:

- **Technical Leadership on the Accounting Generator System:** Designed and developed the architecture entirely in **C#**, fulfilling the robustness standards required by the financial sector.
- **Processing Optimization:** Implemented a batch processing strategy (*Batch Processing*) in **C#**, boosting operational efficiency and reducing processing times by [X]%.
- **Data Management:** Enhanced data management and analysis capabilities utilizing **C# ASP.NET 4** and **SQL Server 2012**, ensuring the integrity of sensitive information.

Education

- | | |
|---|----------------|
| • Universidad Icesi
Master of Science (M.S.) in Information Technology Management | February 2024 |
| • Universidad Javeriana
Master of Science (M.S.) in Software Engineering | September 2026 |
| • Universidad Javeriana
Specialist in Software Engineering | October 2022 |
| • Universidad Cooperativa de Colombia
B.S. in Systems Engineering | December 2016 |
| • Certiprof
<i>Scrum Master</i> | May 2020 |

Technical Skills

- ✓ Programming Languages: C#, Java, JavaScript, PHP
- ✓ Frameworks & Technologies: ASP.NET, .NET Core, Angular, jQuery, Hibernate, JPA, Spring
- ✓ Databases: SQL Server, Oracle, MongoDB
- ✓ Cloud & Architecture: AWS, Google Cloud, Software Architecture
- ✓ Agile Methodologies: Scrum Master

Soft Skills

- ✓ Responsibility
- ✓ Flexibility
- ✓ Teamwork
- ✓ Effective Communication
- ✓ Problem Solving
- ✓ Leadership
- ✓ Adaptability
- ✓ Critical Thinking
- ✓ Negotiation
- ✓ Creativity
